Datasets

Stat 154/254

The following datasets are used in lectures, homework, and labs.

Births dataset

Every year, the US releases to the public a large data set containing information on births recorded in the country. This data set has been of interest to medical researchers who are studying the relation between habits and practices of expectant mothers and the birth of their children. This is a random sample of 1,000 cases from the data set released in 2014.

Columns

- fage: Father's age in years.
- mage: Mother's age in years.
- mature: Maturity status of mother.
- weeks: Length of pregnancy in weeks.
- premie: Whether the birth was classified as premature (premie) or full-term.
