

# Statistics 154 / 254: Statistical machine learning

UC Berkeley, Fall 2026

Table 1: Calendar (tentative)

| Date   | Day       | Note                   | Unit                            | Topic | Assignment    |
|--------|-----------|------------------------|---------------------------------|-------|---------------|
| Aug 27 | Thursday  | Lecture                | Course policies                 |       |               |
| Aug 31 | Monday    | Lab                    |                                 |       | Python review |
| Sep 1  | Tuesday   | Lecture                | Unit 0: Introduction and review |       |               |
| Sep 3  | Thursday  | Lecture                |                                 |       | HW 0          |
| Sep 7  | Monday    | Administrative holiday | Unit 1: Regression              |       |               |
| Sep 8  | Tuesday   | Lecture                |                                 |       |               |
| Sep 10 | Thursday  | Lecture                |                                 |       | Quiz 0        |
| Sep 14 | Monday    | Lab                    |                                 |       | Challenge 1   |
| Sep 15 | Tuesday   | Lecture                |                                 |       |               |
| Sep 16 | Wednesday | Add / drop deadline    |                                 |       |               |
| Sep 17 | Thursday  | Lecture                |                                 |       |               |
| Sep 21 | Monday    | Lab                    |                                 |       | Challenge 1   |

| Date   | Day      | Note    | Unit                            | Topic | Assignment  |
|--------|----------|---------|---------------------------------|-------|-------------|
| Sep 22 | Tuesday  | Lecture | Unit 2: Classification          |       |             |
| Sep 24 | Thursday | Lecture |                                 |       | HW 1        |
| Sep 28 | Monday   | Lab     |                                 |       | Challenge 1 |
| Sep 29 | Tuesday  | Lecture |                                 |       |             |
| Oct 1  | Thursday | Lecture |                                 |       | Quiz 1      |
| Oct 5  | Monday   | Lab     |                                 |       | Reading 1   |
| Oct 6  | Tuesday  | Lecture | Unit 3: Risk and Complexity     |       |             |
| Oct 8  | Thursday | Lecture |                                 |       | HW 2        |
| Oct 12 | Monday   | Lab     |                                 |       | Challenge 2 |
| Oct 13 | Tuesday  | Lecture |                                 |       |             |
| Oct 15 | Thursday | Lecture |                                 |       | Quiz 2      |
| Oct 19 | Monday   | Lab     |                                 |       | Challenge 2 |
| Oct 20 | Tuesday  | Lecture |                                 |       |             |
| Oct 22 | Thursday | Lecture |                                 |       |             |
| Oct 26 | Monday   | Lab     |                                 |       | Challenge 2 |
| Oct 27 | Tuesday  | Lecture | Unit 4: Trees and weak learners |       |             |
| Oct 29 | Thursday | Lecture |                                 |       | HW 3        |
| Nov 2  | Monday   | Lab     |                                 |       | Reading 2   |
| Nov 3  | Tuesday  | Lecture |                                 |       |             |
| Nov 5  | Thursday | Lecture |                                 |       | Quiz 3      |
| Nov 9  | Monday   | Lab     |                                 |       | Challenge 3 |
| Nov 10 | Tuesday  | Lecture |                                 |       |             |

| Date   | Day            | Note                           | Unit                                           | Topic | Assign-<br>ment  |
|--------|----------------|--------------------------------|------------------------------------------------|-------|------------------|
| Nov 11 | Wednes-<br>day | Adminis-<br>trative<br>holiday |                                                |       |                  |
| Nov 12 | Thurs-<br>day  | Lecture                        |                                                |       |                  |
| Nov 16 | Monday         | Lab                            |                                                |       | Chal-<br>lenge 3 |
| Nov 17 | Tuesday        | Lecture                        | Unit 5: Neural<br>networks and<br>optimization |       |                  |
| Nov 19 | Thurs-<br>day  | Lecture                        |                                                |       | HW 4             |
| Nov 23 | Monday         | Lab                            |                                                |       | Chal-<br>lenge 3 |
| Nov 24 | Tuesday        | Lecture                        |                                                |       |                  |
| Nov 25 | Wednes-<br>day | Thanks-<br>giving              |                                                |       |                  |
| Nov 26 | Thurs-<br>day  | Thanks-<br>giving              |                                                |       |                  |
| Nov 27 | Friday         | Thanks-<br>giving              |                                                |       |                  |
| Nov 30 | Monday         | Lab                            |                                                |       | Reading<br>3     |
| Dec 1  | Tuesday        | Lecture                        |                                                |       | Quiz 4           |
| Dec 3  | Thurs-<br>day  | Lecture                        | Class review                                   |       | HW 5             |
